***Election/Restriction***

1. After further reviewing the pending claims 1-67 a new Restriction requirement is made. Examiner is sorry for any burden it may bear to the applicant.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-22, 33-53 and 64-67, drawn to Compressing/decompressing, classified in class 709, subclass 247.

II. Claims 23-32, 28-32 and 54-63 drawn to Alternate path routing, classified in class 709, subclass 239. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such

Art Unit: 2157

claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
